

THE OAK TREE FOUNDATION FOR AMORGOS

The Oak Tree Foundation for Amorgos aims at:

- ⤴ gathering and uniting people around actions for the Amorgian ecosystem
- ⤴ surveying and inventorying the natural features of Amorgos
- ⤴ promoting their conservation
- ⤴ creating a database (pictures, field surveys and cartography)
- ⤴ gathering the knowledge of the local people of the island
- ⤴ creating a seedbase and nursery
- ⤴ spotting the main natural symbols and marking them (for example, putting plates on the most significant trees)
- ⤴ organising activities with the young children of Amorgos (like planting and adopting a tree) and school outings
- ⤴ maintaining and developping the paths and promoting alternative tourism
- ⤴ facilitating and initiating ecological projects (reforestation, creation of a botanical path)
- ⤴ serving as an organ of action and reference for the Island Council and external actors
- ⤴ supporting the Trees for Greece Project on Amorgos and any other rehabilitation project.

Its core values are:

COMMON ACTION

We can't go anywhere if we one goes left and the other right. We have to adjust our views to reach common solutions through open assembly.

This can only work out with:

TRANSPARENCY

All the information, targets, mode of functioning, budget, have to be public and clear.

INDEPENDANCE

The Oak Tree's action has to be absolutely free of partisan or political pressures. It will work solely for non-profit targets, financially as politically.
